# Technical Data Sheet

## DENATURANT BLACK™

**DENATURANT BLACK** is a chemical denaturant for purposes of identifying meat and poultry carcasses and products that are intended for disposal, for purposes other than human food or are condemned for pathology and intended for disposal only as tankage. All ingredients making up this de-characterizer are non-toxic so that the product is safe to handle even in its concentrated form and does not affect meat and bone meal used as animal feeds. The strongly identifiable black color penetrates both the meat parts and fat layer and will not wash off under ordinary conditions.

### DENATURANT BLACK is:

- A Denaturant
- A De-characterizer

For

- Meat Products
- Poultry Products

### DIRECTIONS

Dilute with water to a 1:20 Dilution. Or as required by inspectors.
